Our ref:PAS/CS/33442
Your ref:2403-109932/023

Dear Sirs,

Russian Patent Application No.5052280.13
of Philip Morris Products Inc.
Your ref:2403-109932/041 - Our file:33442

Thank you for your fax of 28th April concerning the basis for the new claims.

Thank you also for identifying the equivalents between the new claims and the old claims or description.

With regard to claim 6, the specification in the last six lines of page 18 gives a range of 300 psig to 500 psig but Example 1 at page 24, lines 5 and 7 refer to a range of 250 psig to 300 psig. The range given in claim 6 is a combination of these ranges. Claim 7 relates to Example 2 in which the initial pressure is 185 psig (see lines 3 and 5 of Example 2 on page 24) and the increased pressure is 430 psig (see lines 8 and 9 of Example 2).

We hope that this will enable you to give a complete reply to the Examiner.

Yours faithfully,

P.A.Smith
